Professional Summary

Computer Science undergraduate graduating in 2027 with frontend internship experience at THYO India and full-stack project experience. Developed responsive React and TypeScript interfaces, REST API integrations, real-time interview features, and geolocation workflows using Node.js, Spring Boot, and MongoDB.

Experience

THYO India Consultancy Services Private Limited

Jun 5, 2026 - Jul 5, 2026

Intern - Frontend Development

- Built React.js and TypeScript dashboards for 2 CodeGear user roles - candidates and interviewers - supporting interview management and coding practice.
- Connected the coding interface to REST APIs for starter code, test cases, and execution output so candidates could run code and review results in one workspace.
- Standardized reusable Tailwind CSS components across dashboards and interview screens, maintaining consistent layouts and interactions across screen sizes.

Projects

CodeGear | Real-Time Interview Platform

[GitHub](#)

React.js, TypeScript, Java, Spring Boot, MongoDB, WebSocket, WebRTC, Google Gemini

- Enabled live technical interviews by combining synchronized Monaco editing, WebSocket/STOMP chat, WebRTC video calls, and screen sharing in one room.
- Added code execution for 3 languages (Java, Python, and C++), with starter code, test cases, and submission feedback in a single practice workflow.
- Integrated Google Gemini to generate tailored mock interviews and feedback across 4 assessment dimensions, with overall scores and saved reports.

Smart Waste Collection System

[GitHub](#)

React.js, JavaScript, Node.js, Express.js, MongoDB, Leaflet, OSRM

- Built a MERN waste-collection prototype with simulated bin monitoring and 5-second task refreshes, giving admins and drivers visibility into collection status.
- Automated nearest-pickup selection using Haversine distance and browser geolocation, then integrated OSRM road routing into interactive Leaflet maps.
- Added JWT-based admin sign-in and MongoDB pickup updates that reset collected bins, with bcrypt hashing to protect stored passwords.

Education

Parala Maharaja Engineering College, Berhampur

2023 - 2027 (Expected)

Bachelor of Technology in Computer Science and Engineering

Technical Skills

Languages: Java, JavaScript, TypeScript, C, Python, HTML, CSS

Frontend: React.js, Next.js, Tailwind CSS, Responsive Web Design

Backend and Database: Node.js, Express.js, Spring Boot, REST APIs, MongoDB, JWT

Tools: Git, GitHub, Postman, Vite, Maven, VS Code, IntelliJ IDEA

CS Fundamentals: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks
